COMPANY

OLGIATI PAOLO & C. S.n.c.

The Company was born in 1962 as a sole proprietorship, then through a modernization and innovation progress, it became a well established company in design and realization **of injection moulds and die casting**.

We matured a long high quality and technology experience which is able to satisfy each market demand.

A very advanced technology enables to produce various and complex molds, assuring a high quality and a rapidity execution.

Basing on a large experience it is able to study and to produce

little and big molds with various mold systems.
